VITHIKA PUNGLIYA

+91 8484822102 | vithikapungliyauni@gmail.com | LinkedIn | GitHub | YouTube
Address: 703, The Orion Residency, Salisbury Park, Pune (411037), Maharashtra, India.

Objective: Dedicated student seeking to pursue a master's in computer science with a specialization in Artificial Intelligence.

EDUCATION

VISHWAKARMA INSTITUTE OF TECHNOLOGY   *Pune, India*
Bachelor of Technology in Artificial Intelligence and Data Science   *Expected May 2024*

Cumulative GPA: **9.5/10.0** (Cumulative of 6/8 semesters)

Relevant Coursework: Engineering Mathematics, Discrete Structures & Automata Theory, Statistics Inference, Data Science, Advanced Data Structures, Computer Organization and Architecture, Database Management & Data Mining, Computer Networks, Object Oriented Programming in Java, Machine Learning, Artificial Intelligence, Operating Systems, Cloud Computing, Deep Learning, Complexity of Algorithms.

EXPERIENCE

The Robotics Forum, VIT- Robosoft.   *Pune, India*
Technical Head| Machine Learning Domain   *June 2021 – June 2022*
- Led a workshop on Deep Learning and Fundamentals of Java Programming with 80+ participants.
- Worked on Machine Learning and Deep Learning Projects:
    - Traffic Sign Classification using CNN.
    - Bird Sound Recognition using Transfer Learning.
    - Chatbot using LSTM Neural Networks.

WeekendAI   *Pune, India*
Data Science Intern| Generative AI   *March 2023 – June 2023*
- Project: Retrieval Question Answering System
- Tools & Libraries: Cohere, SpeechRecognition, PyPDF, Langchain, ChromaDB, Streamlit
- Skills: Prompt Engineering

Research Assistant| Generative AI
- Co-author of the book titled- "Generative AI for everyone". (To be released in January 2024)

Wolters Kluwer Pvt Ltd India.   *Pune, India*
Data Science Intern| CIOX, Financial and Corporate Compliance   *July 2023 – Dec 2023*
- Project: CodeSense- Perfecting fine-tuning methods for large language models in domain-specific contexts.
- Project: PDF Quality Assessment & Analysis
- Tools & Libraries: AzureOpenAI, FastAPI, OpenCV
- Skills: Fine Tuning of Large Language Models, Image Processing

Board of Studies
Student Representative | Vishwakarma Institute of Technology   *Pune, India*
                                                                                             July 2023 – May 2024

PROJECTS

A Hybrid Approach for Deep Learning based Video Classification and Captioning using a Novel Key Frame Extraction Technique
- Inspired by ISRO | Smart India Hackathon 2022
- To generate metadata i.e., the labels of every video using Image Processing and Deep Learning.
- To generate Context-based Captions of the Videos using Deep Learning.
- To categorize the all-video programs into multiple genres using a fully labelled dataset.
Tools and Libraries: OpenCV, TensorFlow, Keras, PIL, GloVe

Deep Learning Based Application for Fresh Produce Yield and Price Forecasting Based on Station-Based Soil Parameters.
- Inspired by Mitacs | University of Waterloo, Canada
- The project is a multivariate time series problem statement which is under current research in the University of Waterloo, Canada.
- The price and yield of Strawberries are being forecasted using advanced Deep Learning techniques like LSTM.
- Furthermore, a comparison is drawn between conventional statistical methods and Deep learning Methods.
Tools and Libraries: Matplotlib, Tableau, Pandas, NumPy, Seaborn, TensorFlow, Keras.

Blight Ticket Compliance Prediction
- Inspired by "Applied Machine Learning" course by University of Michigan.
- The project aims to find the compliance towards Blight Ticket being paid on time or not.
- 8 Regressors and 8 Classifiers to perform the above-mentioned problem and have got a Highest AUC score of 0.806.
- Important take away from this project is that Regressors can be used as Classifiers for performing Binary Classification and achieve at par results.
Tools and Libraries: Excel, NumPy, Pandas, scikit-learn

Classification of Financial Regulations using Multilabel Natural Language Processing

- Inspired by Data Solve Hackathon organized by Wolters Kluwer India Pvt. Ltd
- The given dataset relates to regulatory updates for providers of banking, insurance, and financial services that have been made public by various regulators.
- We developed NLP models to analyse the content of the Name and Summary of each regulatory update and classify it.
- An ensemble of LGBM + Random Forest gave us the highest F1 Score in the competition.
Tools and Libraries: Nltk, scikit-learn, Pandas, Regex.

SageConv Graph Neural Network Model for Multimodal Regression using a Customised Dataset
- Inspired by Google Quest Kaggle Competition
- Utilizing the Google Quest dataset, the study explores SAGEConv GCN configurations, attaining a promising R2 score of 0.65 and underscoring GNNs' NLU potential for future research.
Tools and Libraries: PyTorch- Geometric, PyTorch, NetworkX, Spacy, Pandas, SciPy.

AI-powered Legal Documentation Assistant
- Inspired by Ministry of Law and Justice | Smart India Hackathon 2023
- AI Based Document drafting of documents while removing legal jargon
- Portal for connecting clients with lawyers and Chat Assistant for answering Legal Queries and understanding Laws of India.
Tools and Libraries: Django, LangChain, GPT-OpenAI, Speech Recognition, ChromaDB, SQLite3, GitHub

VOLUNTEER EXPERIENCE

Pune Ploggers: Plogging drives are carried out on the weekend and the waste on hill slopes and riverbanks is gathered.
Green Hills: With the help of this organization, we have planted around 1000 trees on the hill slopes around Pune.
ReBooks: This organization, partnered with MyPusktak.com, collects used books and distributes them amongst the needy.

ACHIEVEMENTS

- Achieved the highest academic standing in the current batch, attaining a cumulative GPA of 9.5/10
- Received the honor of Ms. Freshers- VIT, 2020 in Freshman Year, triumphing over 500 accomplished participants in the competition.
- 1st Runner Up at Data Solve (A 2-week Machine Driven Based Hackathon) India, 2022, organized by Wolters Kluwer, India.
- Honored with the award of "Remarkable Academic Achievement" by Vishwakarma Institute of Technology.
- 1st out of 210+ teams at the Internal Smart India Hackathon (2022 &2023) conducted at Vishwakarma Institute of Technology.
- Served as the Extracurricular Secretary on the College Council, orchestrating a diverse range of engaging student activities.
- Led as Convener of the Entrepreneurship Development Cell (V-EDC) at VIT Pune, driving initiatives to cultivate innovation and entrepreneurial spirit among students.

CERTIFICATIONS

- Applied Machine Learning, Applied Text Mining and Data Science, Applied Plotting, Charting and Data Representation by University of Michigan.
- Fundamentals of Deep Learning by Nvidia.
- Fundamentals of Linux and Data Analytics and Cloud Computing by Vodafone.
- Math Skills for Data Science by Duke University.
- ChatGPT Prompt Engineering for Developers, LangChain for LLM Application Development, Finetuning Large Language Models, How Diffusion Models Work by DeepLearning,AI.
